

WingoMME Expert Advisor

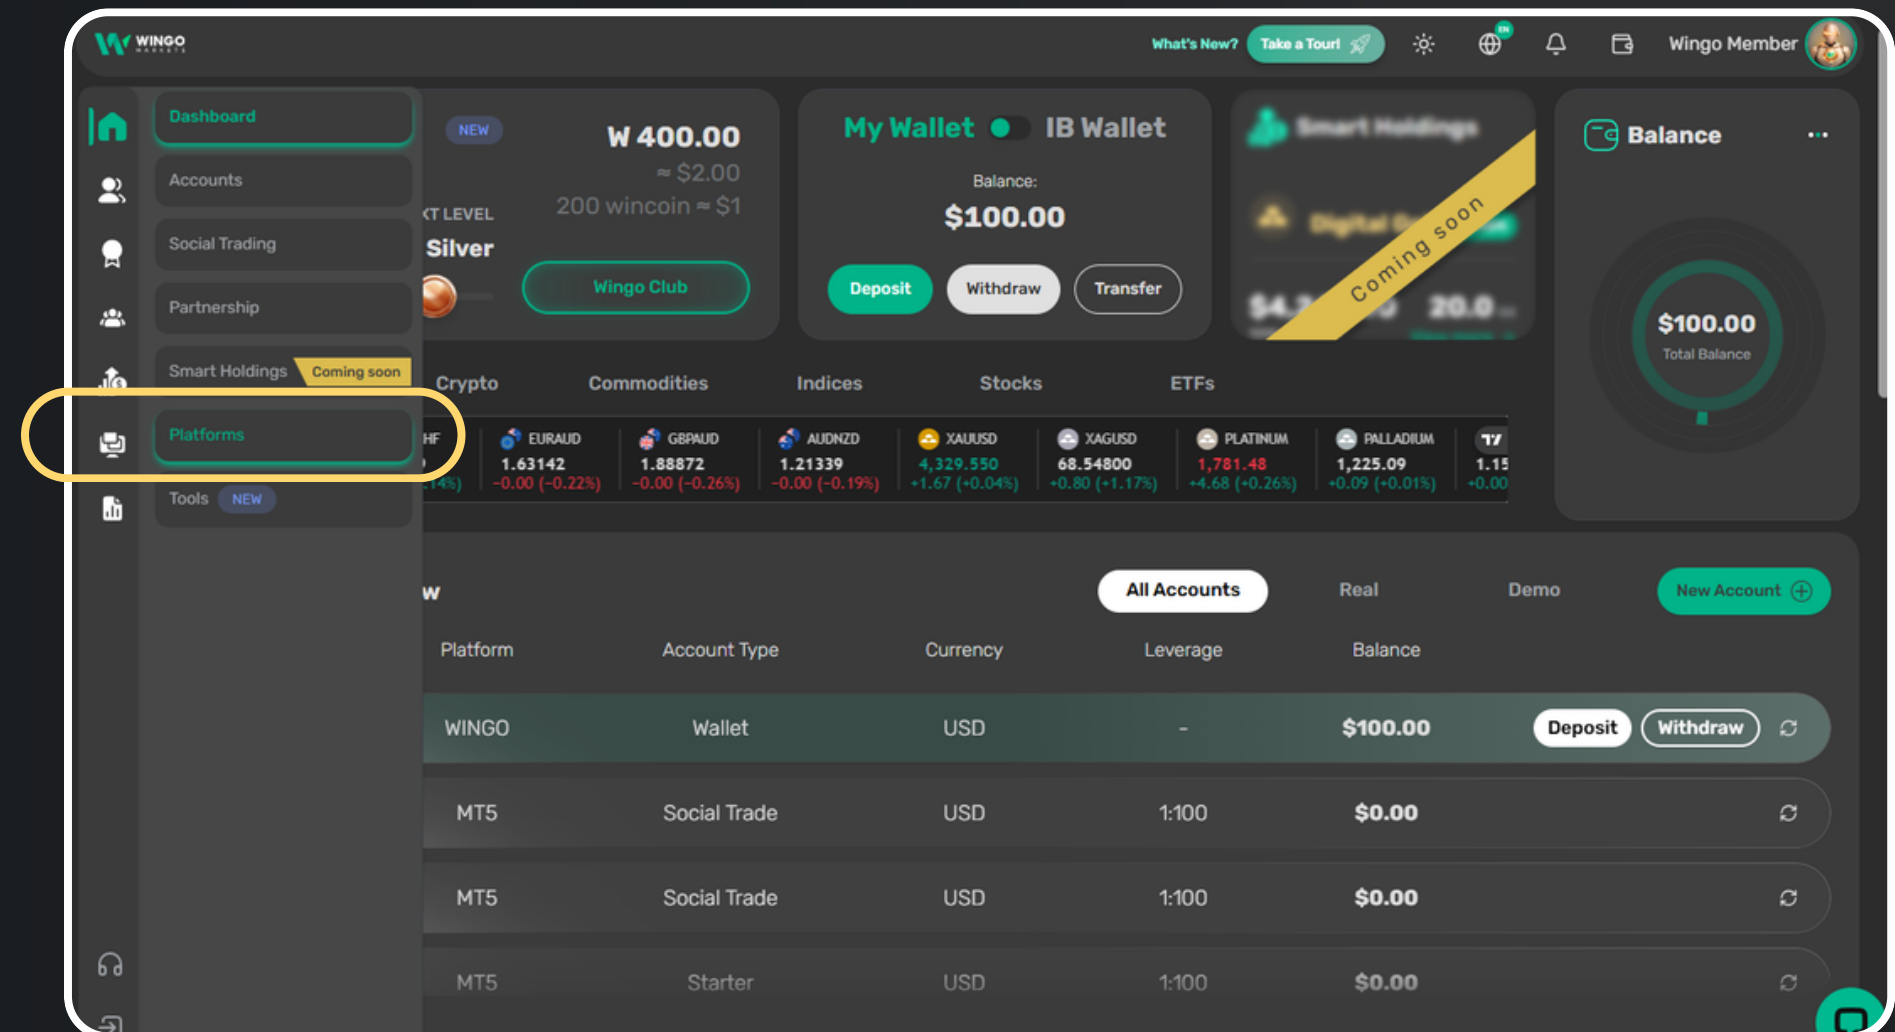

Installation & Activation Guide

WWW.WINGOMARKETS.COM

Step 1: Access the Platform Section

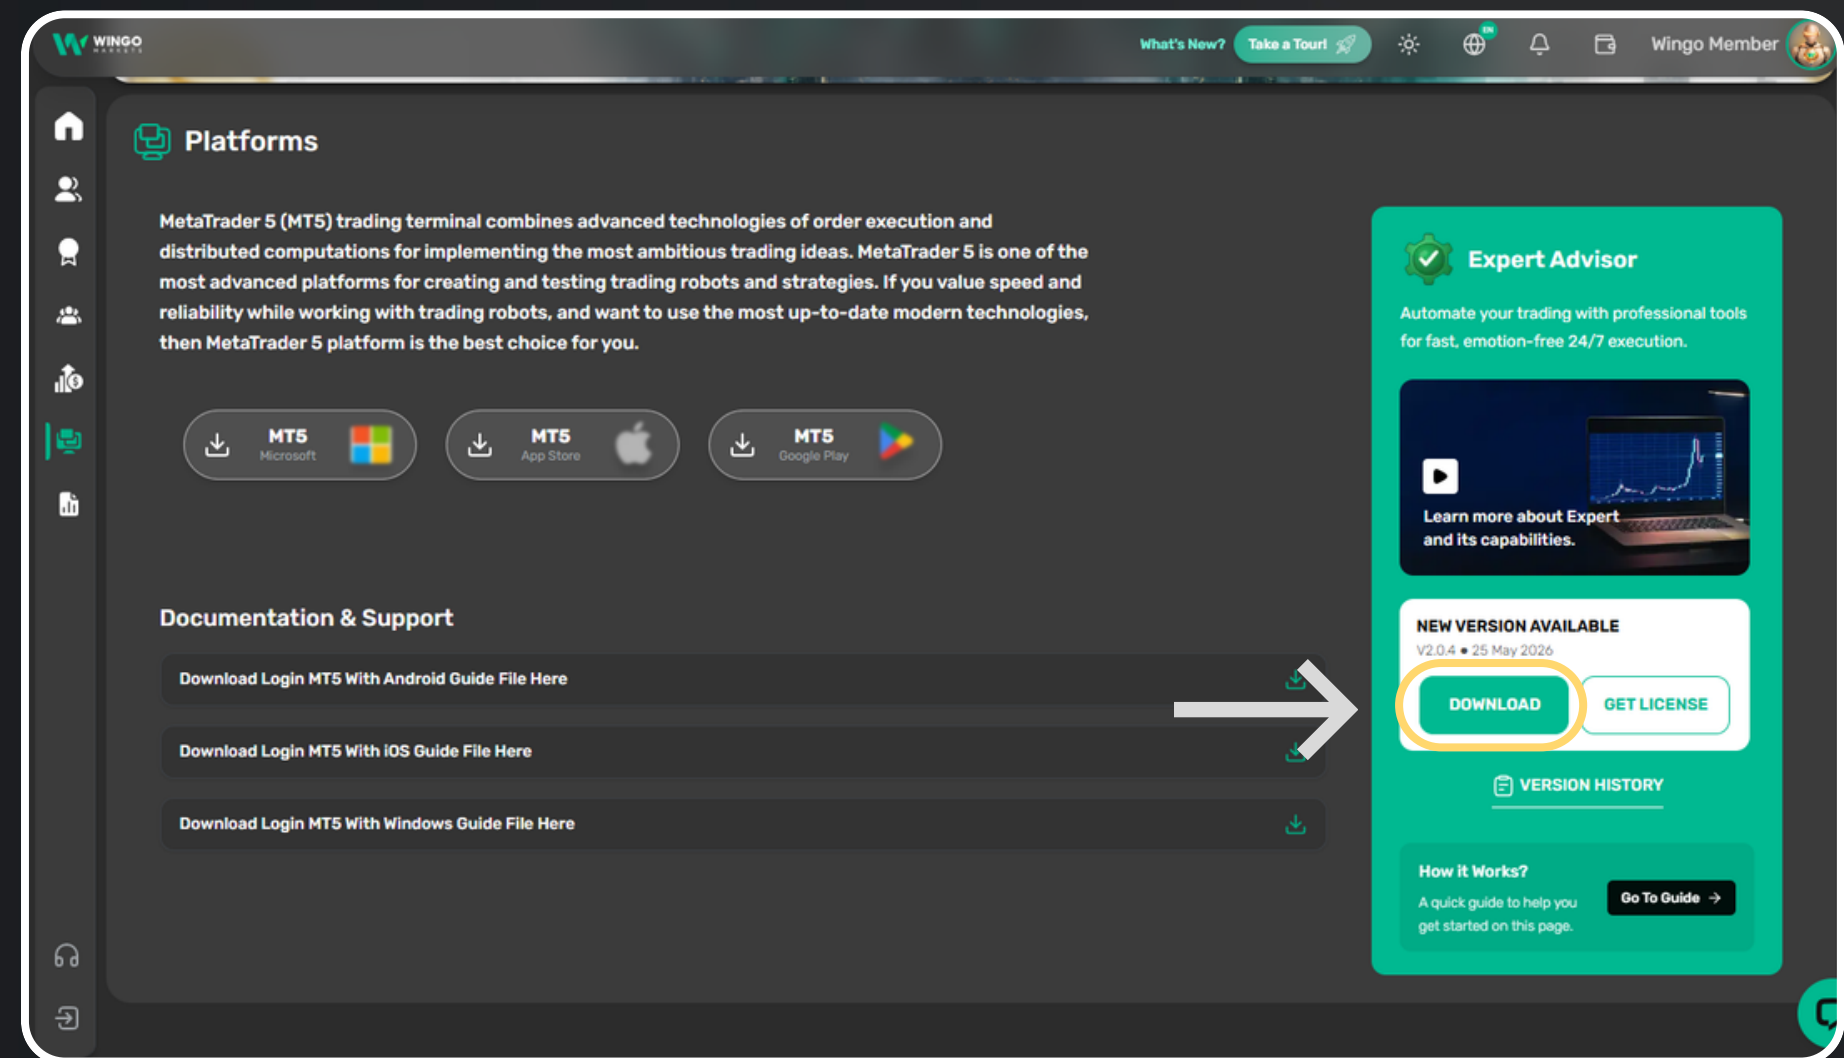

Log in to your user panel and navigate to the **Platforms** section via the right-hand menu.

Step 2: Download the Latest Expert Advisor Version

In the green box labeled “Expert Advisor”, you can see the latest available version.

To download the expert file directly, click the green “Download” button.

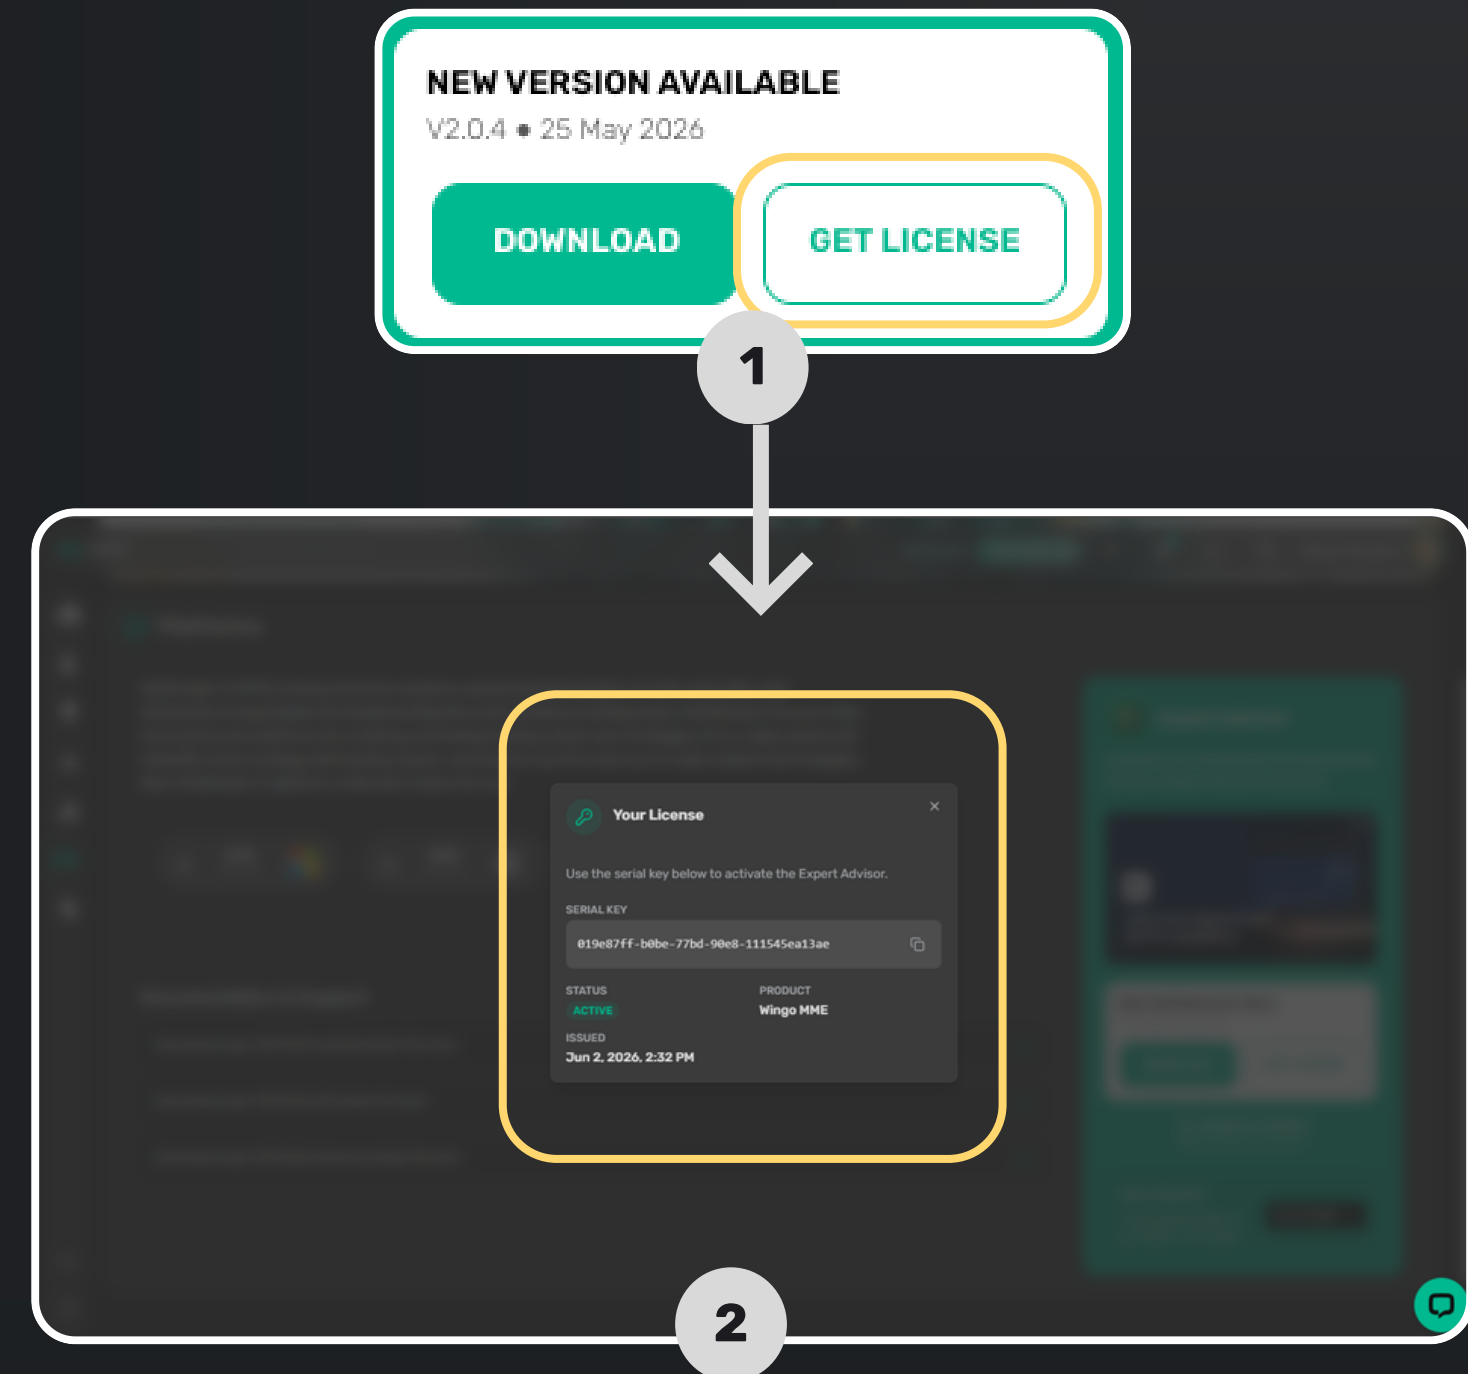

Step 3: Obtain Your License Key (Serial Key)

In the same box, click on [Get License](#).

A box will open displaying your personal [Serial Key](#).

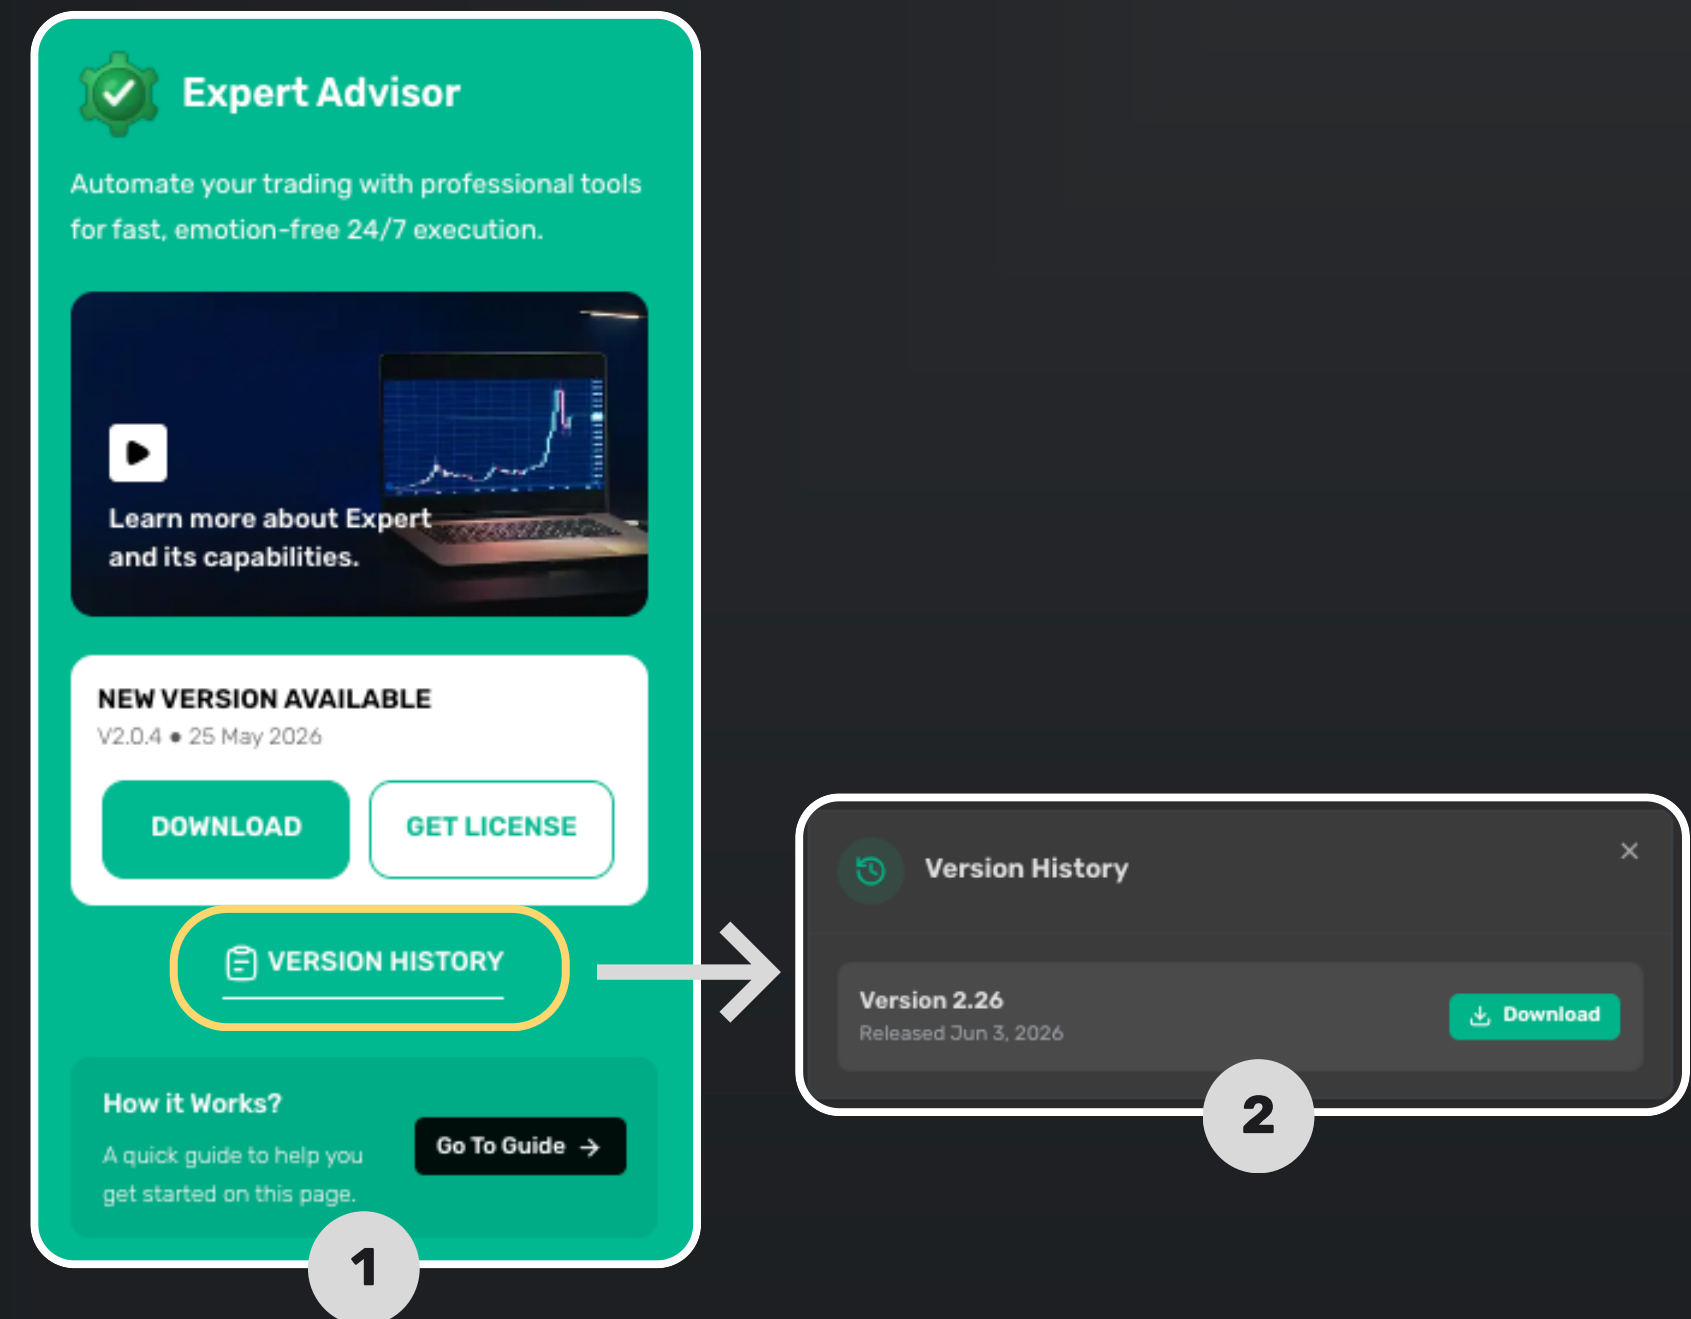

Click the copy icon to save this code, as you will need it for the next steps.

Step 4: View Version History (Optional)

If you would like to download previous versions of the expert or view their release dates, click on [Version History](#).

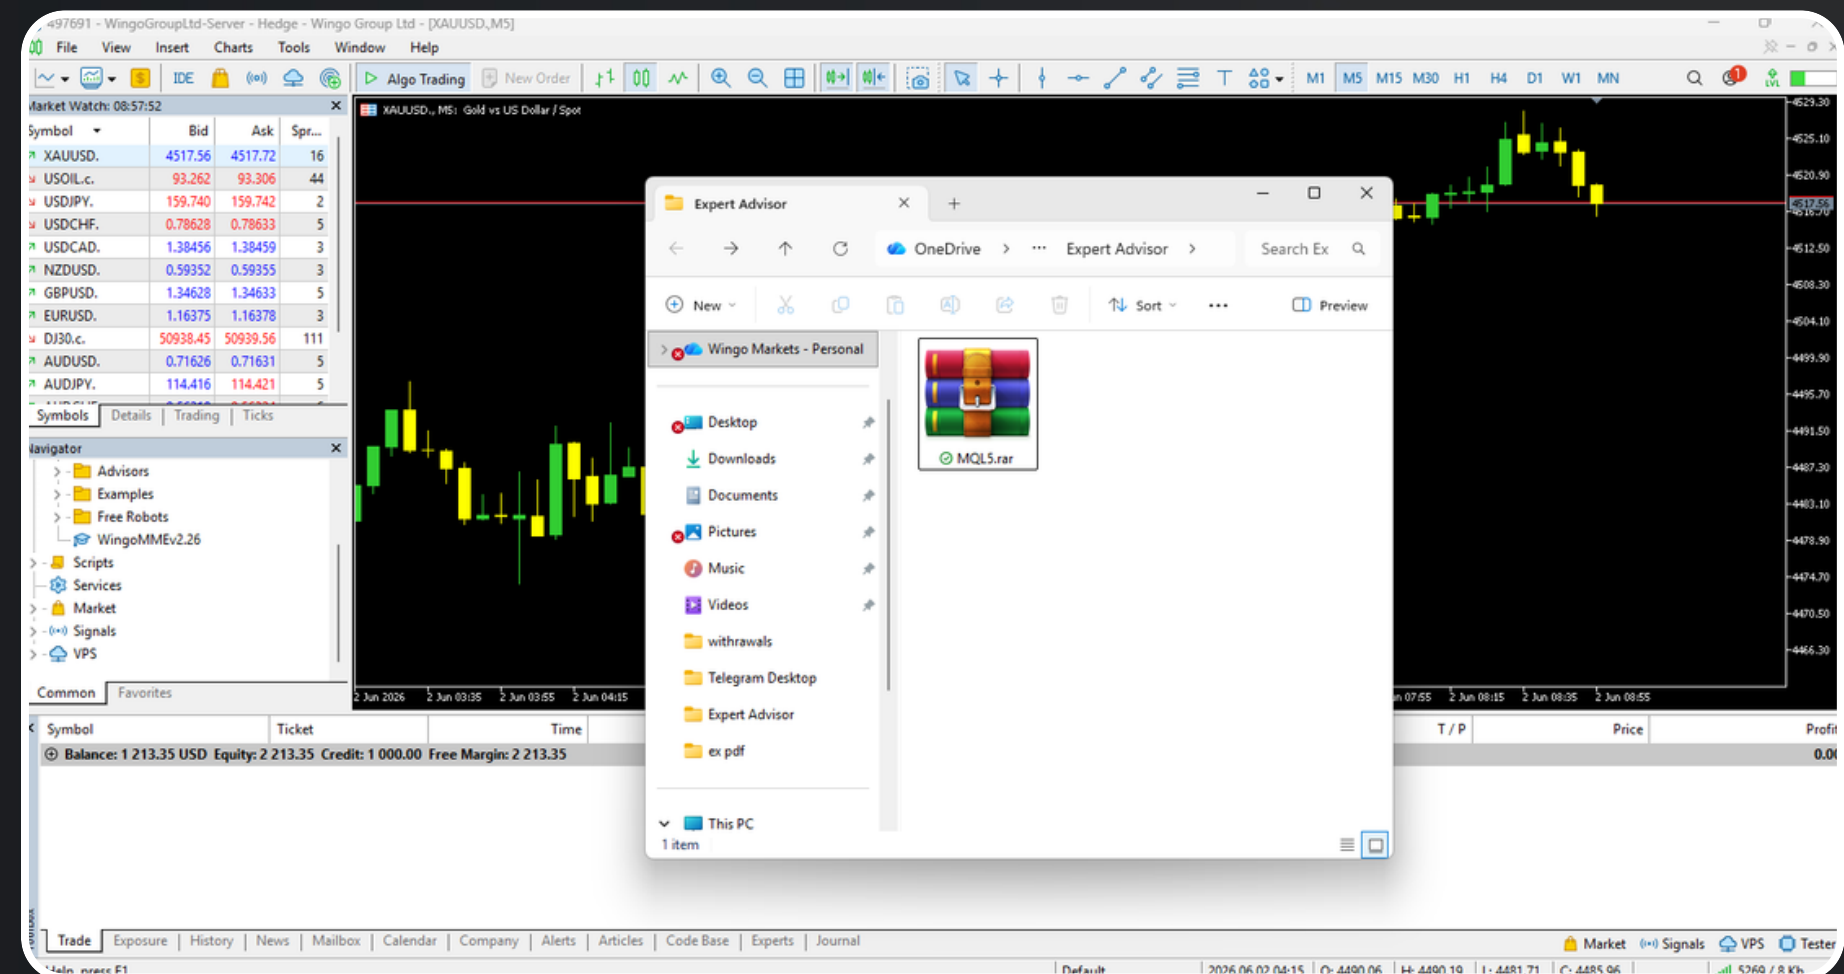

A complete list of all versions will appear, each with its own download button.

Step 5: Extract the Expert File

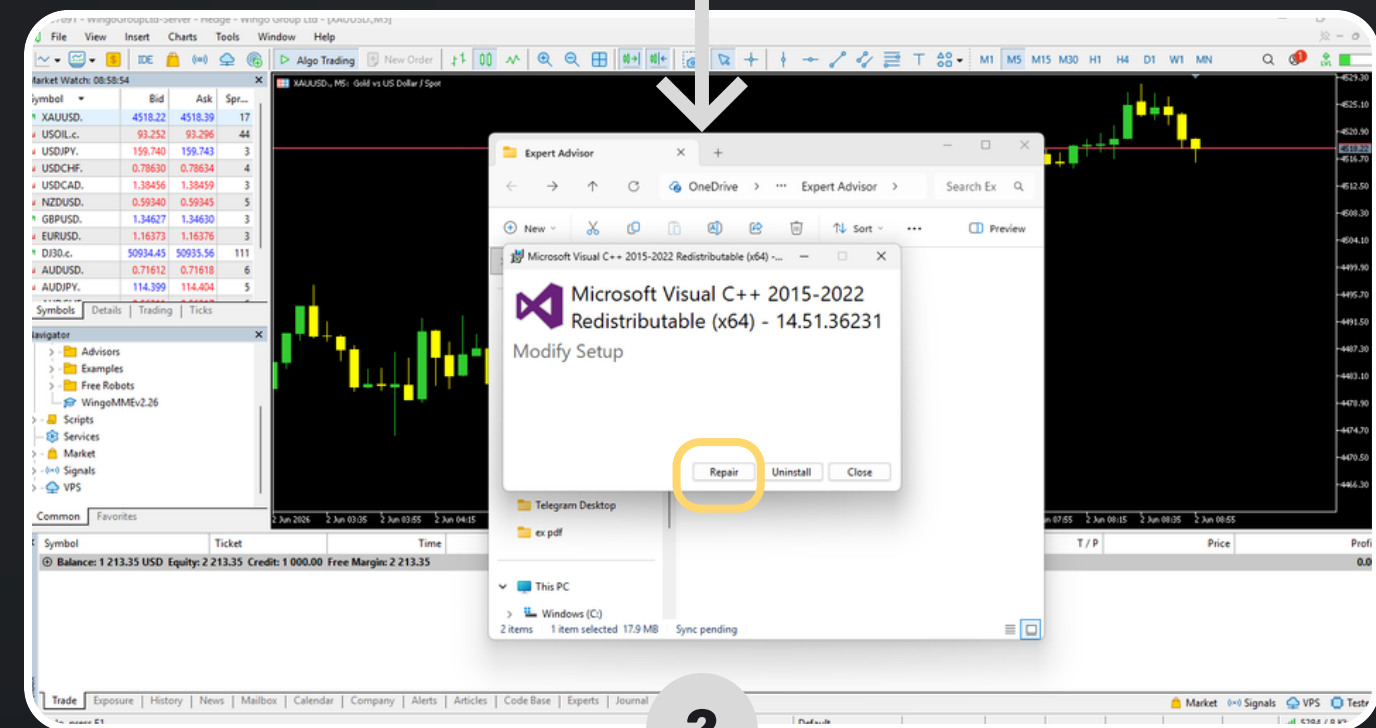

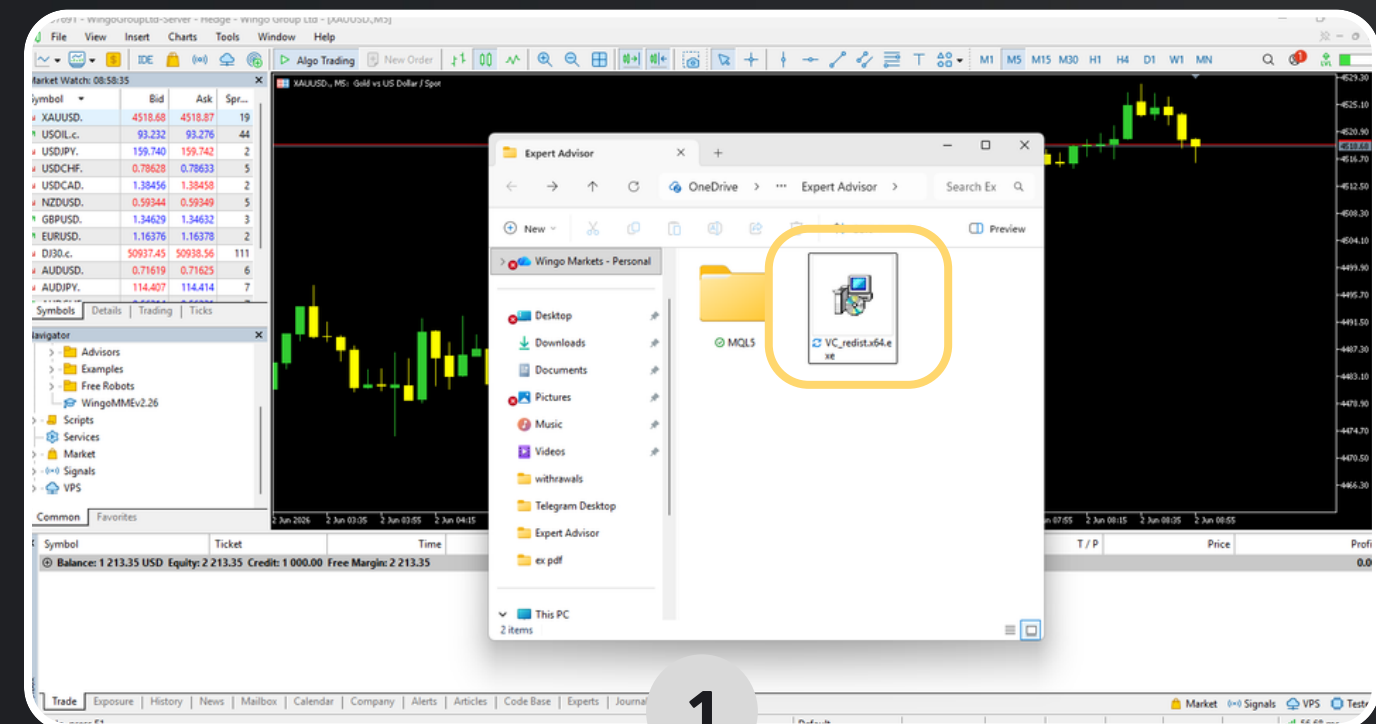

First, extract the compressed expert file (Zip/RAR) that you downloaded in the previous step.

This will give you access to the **MQL5** folder.

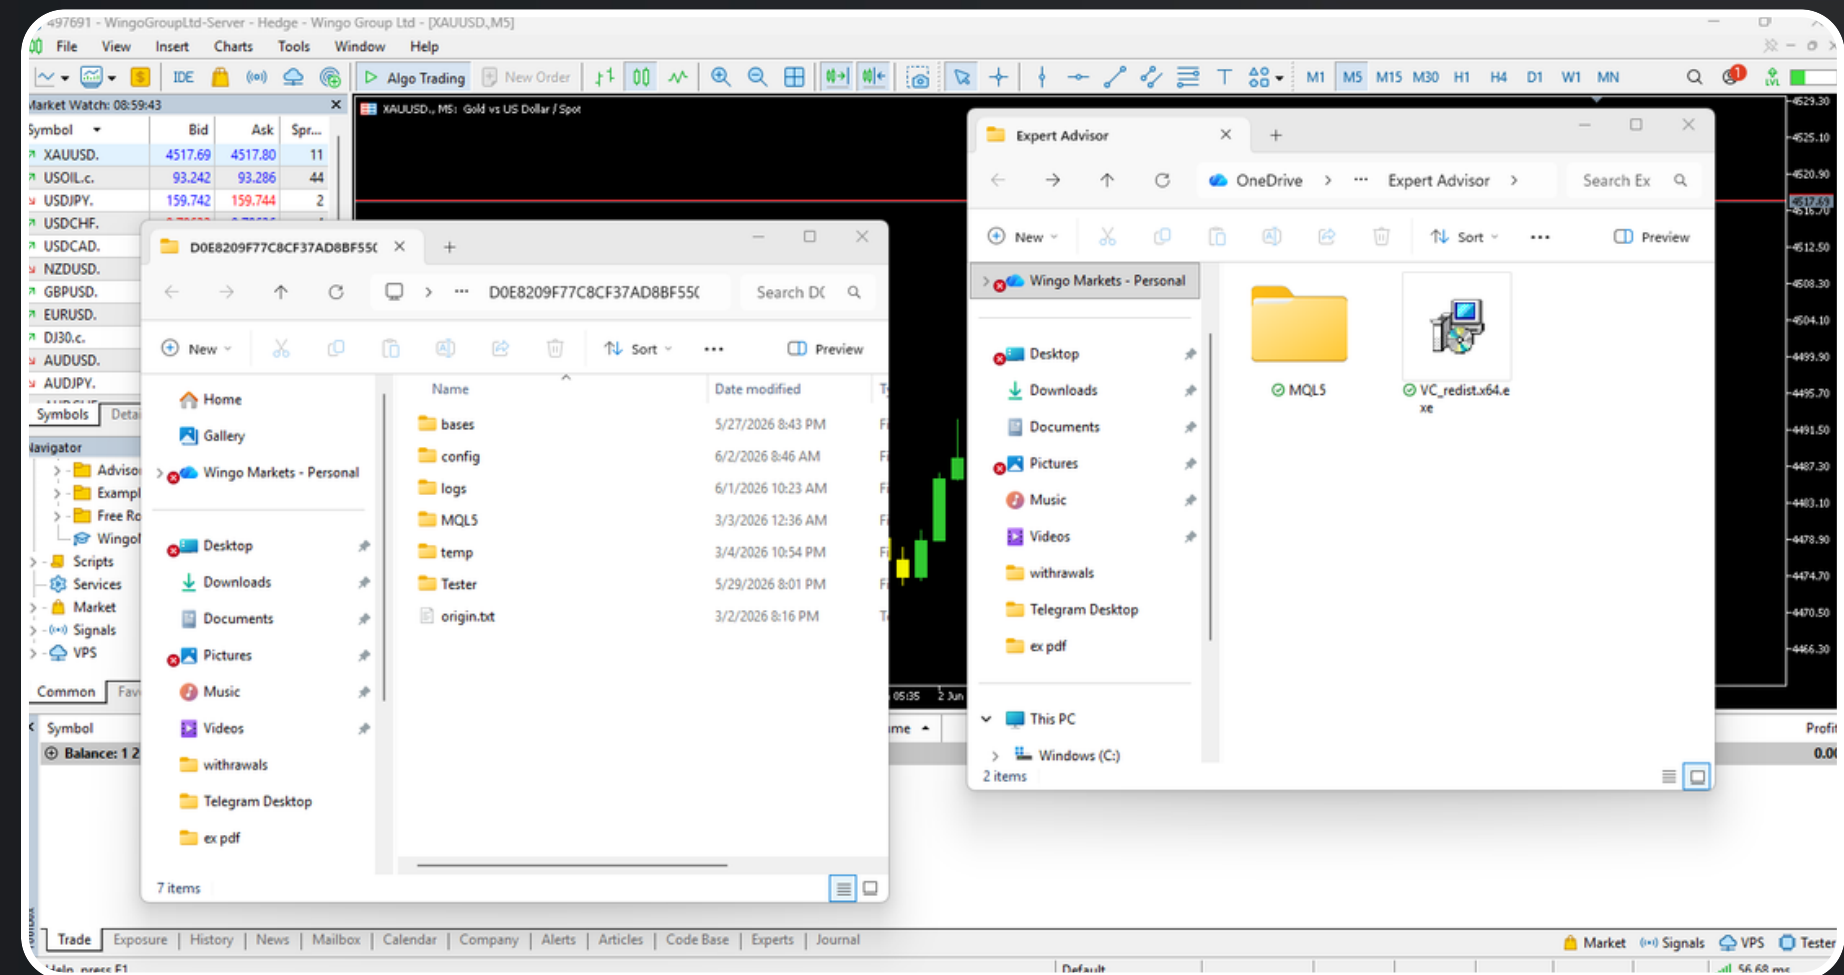

Step 6: Install the System Prerequisite (If required)

If the required Microsoft component is not already installed on your system, run the file **VC_redist.x64.exe** located inside the folder and complete the installation, or select **Repair** if prompted.

Step 7: Copy Files to the MetaTrader Directory

- In MetaTrader 5, click **File** (top-left menu), then select **Open Data Folder**. This will open your platform's data box.
- Copy the contents of the extracted **MQL5** folder and paste them directly into your MetaTrader data directory.

Refresh the Navigator Panel

- Return to MetaTrader.
- In the **Navigator** window (left side of the screen), you should now see the **WingoMME** Expert Advisor listed.

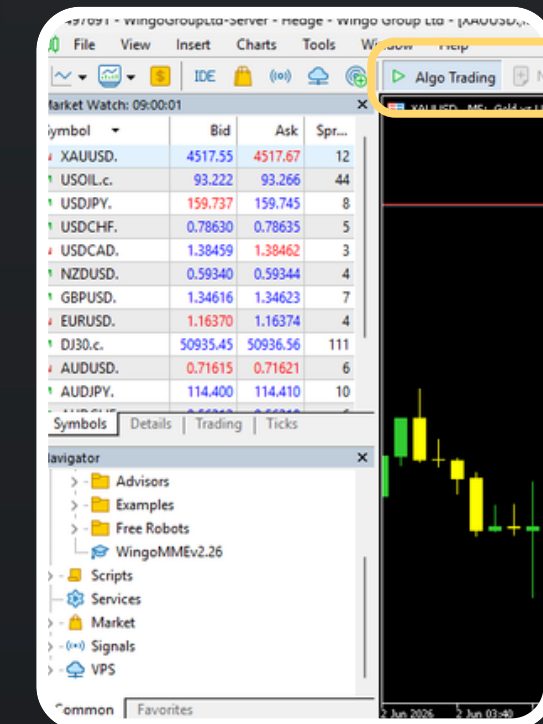

Step 8: Enable Algorithmic Trading

From the top menu in MetaTrader, go to **Tools** → **Options**.

In the **Expert Advisors** tab, make sure to check the following options, then click **OK**:

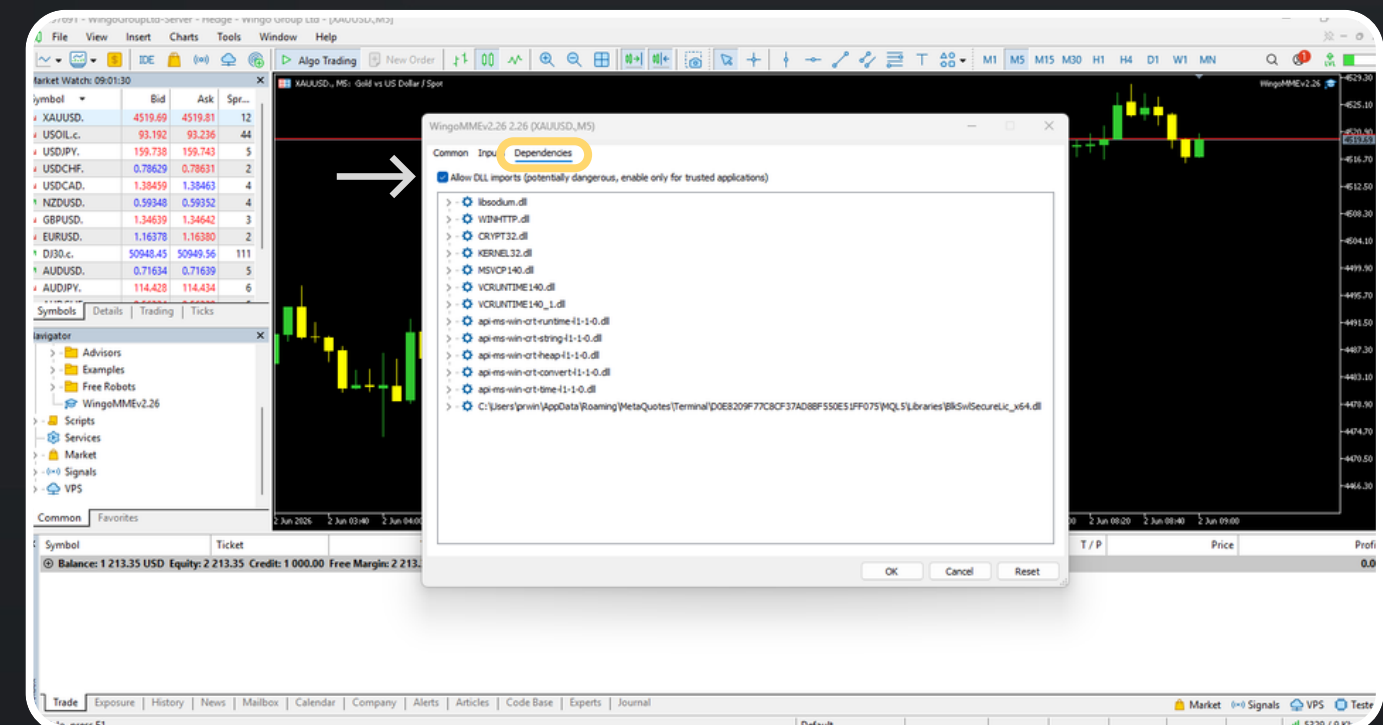

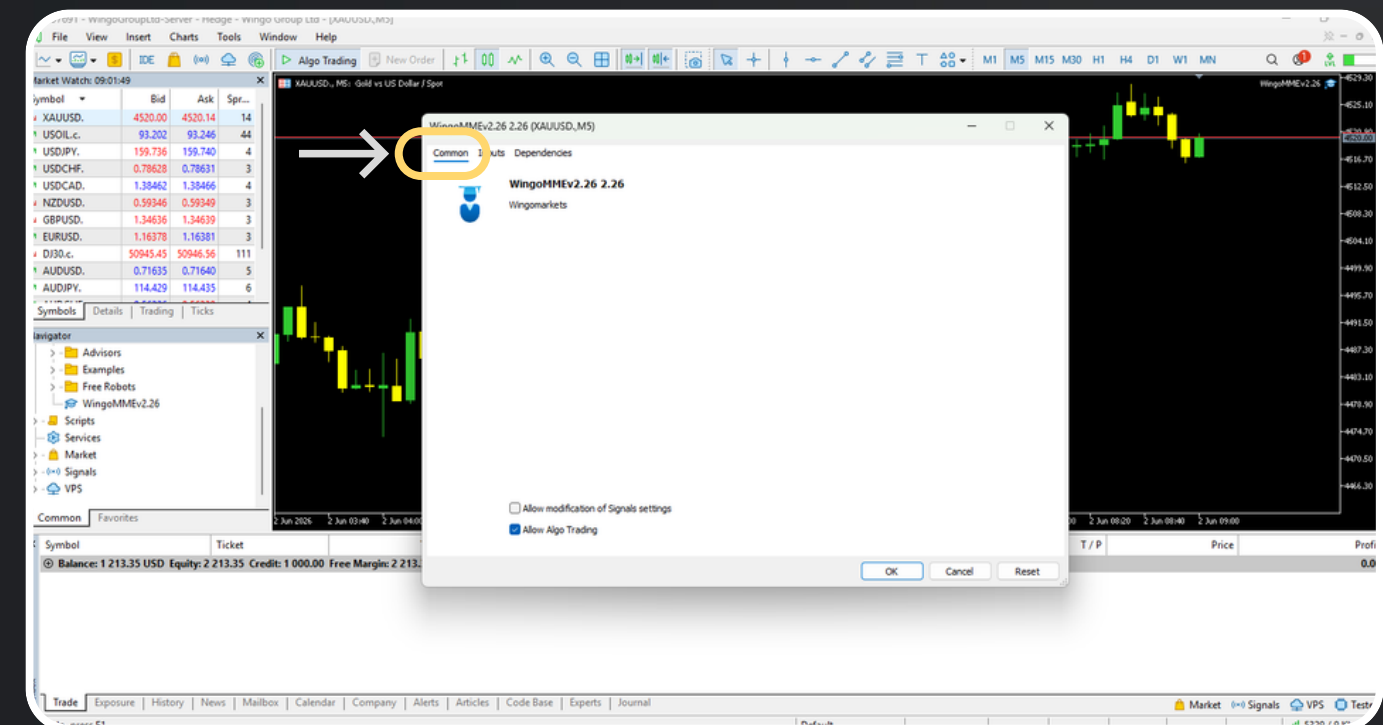

- Allow algorithmic trading
- Allow DLL imports

Important: The green **Algo Trading** button on the top toolbar must also be turned ON (enabled).

Step 9: Confirm Expert Permissions

- To verify permissions, locate **WingoMME** in the **Navigator** panel (left side).
- When the settings window opens:
- In the **Common** tab, ensure **Allow** Algo Trading is checked.
- In the **Dependencies** tab, check that **Allow DLL imports** is enabled.

Step 10: Enter the License Code (Final Step)

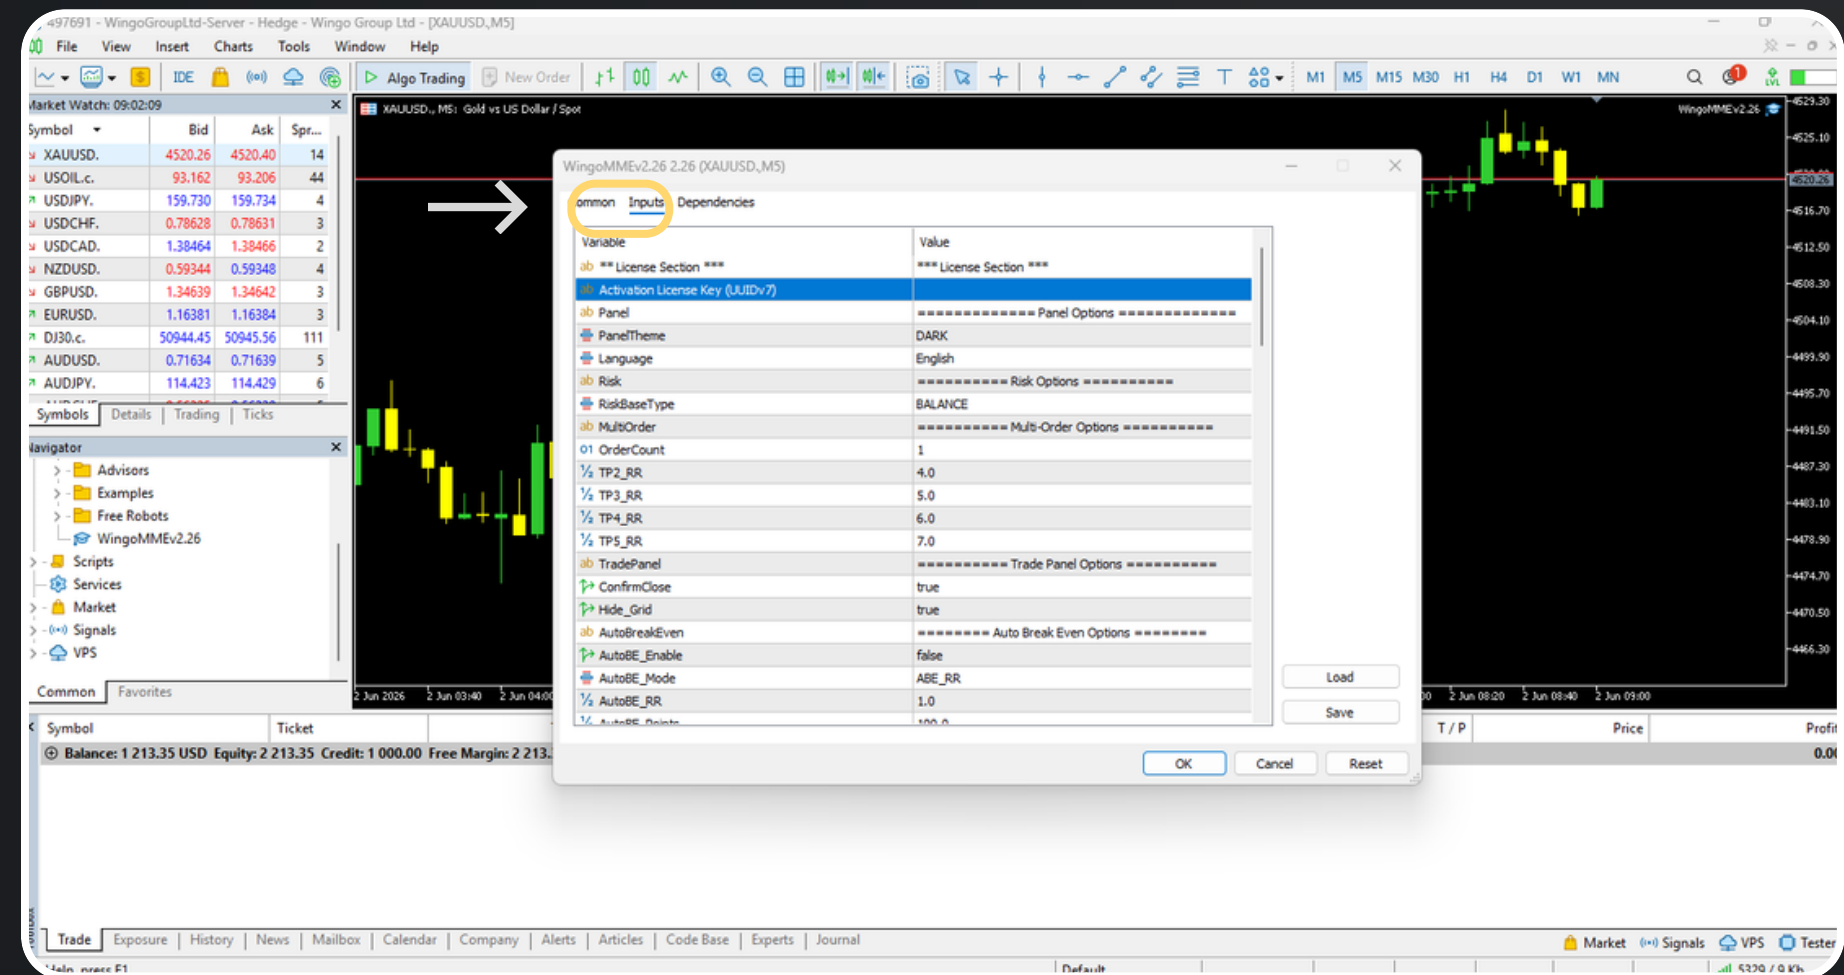

In the same settings window, go to the **Inputs** tab.

Under the **License Section**, find the field labeled **Activation License Key**.

Carefully paste your personal license key into the **Value** field.

After adjusting any other trading parameters, click **OK** to activate the expert and start running it.

Note: If your license does not work, please contact your account manager.

Step 11: Run the Expert on a Chart

Open the chart of your desired currency pair or asset.

Then, drag the [WingoMME Expert](#) Advisor from the Navigator panel and drop it onto the chart.
